

**DENSO SKID RESISTANT OVERBANDING TAPE**

**DESCRIPTION** A polymer modified bituminous tape for surface sealing of cracks or failed reinstatement joints up to 5mm wide in road pavements on secondary roads. Application of the tape prevents ingress of water which can cause further cracking and spalling of the road surface. Once applied the tape has a skid resistant surface. Suitable for hand or machine application.

**COMPOSITION** Thick bituminous adhesive layer with a rubber based backing in tape form with a disposable release paper.
